

HALF ROLLY

Rollable medical device designed for rescue in confined spaces; it is particularly suitable for the evacuation of the injured from narrow places and with narrow or complicated steps. It can be used alone or in combination with ROLLY as immobilizer during vertical transport. It is a highly flexible device, very useful in the evacuation of the injured in complex environmental conditions.

Main features:

- Free of rigid frames and easily storable and transportable in its bag with shoulder straps.
- Easy to clean and disinfect.
- Hanging kit for vertical transportation in pits or tunnels.
- Side handles for transportation by several operators.
- Easy maintenance due to replaceable components.
- High quality, produced in Italy
